

PPCHEM

The Journal of All Power & Plant Chemistry Areas

Media Information 2023

Many fine companies from throughout the world have placed ads in the PowerPlant Chemistry[®] journal (now the PPCHEM[®] journal). Why?

They know that advertising in our journal pays off. The readers of this journal are decision makers in all power and plant chemistry-related fields.

The PPCHEM[®] journal's circulation covers more than 60 countries in Europe, Asia, North and South America, Africa, and Australia.

The first copy of this journal appeared in July 1999. Initially the PPCHEM[®] journal was issued monthly. Since 2013 it has been published 6 times a year.

With the renaming of the journal, we would like to open the journal to authors, readers, and advertisers from outside the field of power generation. Water treatment and cycle chemistry are not only challenges in power generation but also in all industrial processes where water or steam is being used.

Topics covered in the past such as corrosion, cycle chemistry guidelines, DeNOx and DeSOx processes, environmental aspects, flue gas cleaning, instrumentation, ion exchange, monitoring, physical chemistry, plant cycle chemistry, sampling, and wastewater treatment are not solely important in power generation but are of interest to the chemical, pharmaceutical, and process industries as well. The PPCHEM[®] journal wants to serve all users who are involved in efforts to increase reliability, availability, economic viability, and the operational and environmental safety of these processes.
